

# Network & Storage Management Integration with Symantec

- Discover Datacenter Interconnectivity
- Complete Asset Inventory and Visibility
- Single CMDB with Associations
- Network Availability and Health
- Configuration, Change and Compliance for all Devices

RC Synergy is Dorado's revolutionary new collaboration platform for building operational communities across IT silos, igniting real-time problem diagnosis to manage today's converging networks. IT teams have a truly integrated (and highly customizable) experience to quickly access both vital network and service information from anywhere. RC Synergy helps IT teams work faster, better, **and together**.

## TOTAL IT MANAGEMENT

Dorado Software, a leader in network infrastructure management software to find, configure and monitor converging network and storage assets, integrates with the Symantec Management Platform (SMP) for a complete IT infrastructure Management solution.

Dorado's Redcell v7 (RC7) platform works with SMP 7.1 (NS7.1) for visibility into your network and storage infrastructure, specifically informing you how the network is affecting applications, servers and clients.

The combined solution delivers the power of applications, systems, multi-vendor network and storage assets, inventory, configuration, and connectivity knowledge - all from within the SMP.

And RC7 offers you an unprecedented new collaboration platform, RC Synergy, for building operational communities across your IT silos.

## COMPLETE VISIBILITY, CONTROL AND COLLABORATION

RC7 + SMP EXTENSIONS	FULL IT DEVICE SUPPORT
Inventory / Connectivity Data	Routers
Import and Conversions	L2/L3 Switches
Resource Class Additions and Extensions	Blade Switches
Resource Manager and CMDB Associations	ISCSI / FibreChannel Switches
CMDB Resource Association Diagram	Multi-Service Access Nodes
New Configuration Item Tasks	Application Accelerators
File Management	Firewalls
Event/ Alarm Retrieval and Storage	Security Appliances
	Load Balancers
	Networked Printers

## RC7 MANAGEMENT

OPERATIONAL COLLABORATION PLATFORM	
CMDB Inventory	Auto Discovery
Health and Performance Monitoring	Unified Inventory and Reporting
Configuration / Change	Network Connectivity
Firmware Deployment	Application Dependency Mapping
OS Deployment	Network Topology Mapping

**TECH SPECS**

**Supported Extensions**

Resource Type: Component, Card, Port, Interface

**Resource Associations**

New Resource to Component  
Sub component (extended)

**Data classes**

Component Details  
Redcell Identification  
Redcell Task Status  
Basic Inventory Table Inv Aex TCPIP

**Interface Support**

SNMPv1/v2/v3, Proprietary Device CLI, XML, SSH, WMI, CIM, Web Services, HTTP/S

**Complete IT Asset Management**

Routers, Switches, Security Devices, Servers, Storage, Networked Printers

**Device Support Examples**

Cisco  
Dell  
EMC  
Brocade  
Juniper  
Extreme  
Foundry  
HP  
Windows  
Linux

**Database Support**

MySQL  
Oracle

**Operating Environments**

MS Windows:  
2000/XP/2003/Vista/2008 Server R2  
Solaris 9, 10  
Redhat ES Linux 5

**Dorado - Symantec Integration Components**

Redcell v7 (RC7)  
RC Synergy Collaboration Platform  
SMP 7.1 (NS7.1)

**EXTEND MANAGEMENT WITH INTEGRATION**

	DISCOVER	MANAGE
SMP 7.1	Clients Servers Mobile Devices Printers	Clients Servers Mobile Devices
SMP 7.1 + RC7	Routers Switches Wireless SAN Switches Storage Arrays Firewalls	Routers Switches Wireless SAN Switches Storage Arrays Firewalls Printers

**INTEGRATION BENEFITS – ALL FROM THE SMP CONSOLE**

- Seamlessly Add-on to Existing Technology Investment**

Easily extend and enhance the functionality of your SMP investment by harnessing the network and storage knowledge provided by RC7.
- Save Time and Increase Productivity with a Single-Pane-of-Glass View**

Gain total visibility into your datacenter environment, including network device details and their associations to your server infrastructure, all from within your SMP console.
- Manage Change and Stay in Compliance**

Perform important network device configuration operations such as file backup and restorations, all with full audit control.
- Troubleshoot Faster and Better**

Know the health of your datacenter's network and storage infrastructure and how it relates to your applications with event and alarm data.

**AVAILABILITY**

Dorado Software is a Symantec-certified partner. The integration component and the Redcell 7 product line are available on Symantec's 3rd party pricing list. Check the SCORES page for additional information or ask your Symantec representative.
