

Celestica & Dorado Software

Bringing AI Cloud Capabilities to On-Premises and Edge Networks

Unlocking the Power of Open Networking

Celestica's **market-leading open networking hardware**,¹ combined with Dorado Software's **Cruz suite**, delivers a powerful, integrated solution. This partnership offers unmatched **flexibility, high performance, and unified management** across complex, multi-vendor network environments.

Automate operations from the data center to the edge, gaining **real-time visibility and control** to accelerate innovation, **reduce costs**, and future-proof your infrastructure.

Celestica is a proven, global market leader in AI networks and 800G high-speed networks.²

Solution Overview and Customer Benefits

De-Risking Networks with Celestica Switches and Dorado Cruz Software

Enterprises are rapidly adopting open-standards-based networking to drive innovation and reduce costs, with many planning to run **SONiC** across their expanding on-premises and edge networks.

Celestica's highly reliable, open hardware platforms, renowned for their **quality and global supply chain**, combined with Dorado Software's comprehensive Cruz suite, provide a robust solution. This integrated partnership delivers **seamless orchestration and management**, optimizing support costs, reducing downtime, and eliminating manual errors across your hybrid infrastructure.

Unified, Simplified Operations

Gain centralized visibility and full lifecycle management of all diverse network devices through Dorado's **single pane of glass**, seamlessly integrating with Celestica's high-performance hardware.

Automated Deployment and Management

Effortlessly deploy, update, and monitor L2/L3 switch fabrics on Celestica hardware with automated software updates and dependency validation, reducing time and complexity.

Enhanced Security and Compliance

Proactively manage installations and ensure security with automated **configuration validation**, change auditing, and compliance enforcement, ensuring the integrity of your network.

Superior Performance and Visibility

Leverage Celestica's future-ready hardware with Dorado's robust log and telemetry support for comprehensive metric collection, analysis, and visualization, providing unparalleled insight into network health.

Zero-Touch Automation and Global Support

Benefit from Dorado's **built-in automation** for effortless device discovery and Day 2 operations, supported by Celestica's global footprint and readily available products.

Together, Celestica and Dorado Software empower organizations to confidently modernize their infrastructure, gaining the agility of open technologies and achieving long-term success with an optimized, future-proof network.

Partner Profiles

About Dorado Software

Dorado Total Networking Solutions provide a comprehensive, integrated package of hardware, SONiC, and the **Cruz management platform**, simplifying the deployment, operation, and scaling of open networking environments. This unified approach delivers complete **visibility, automation, and control** for NetOps, ensuring efficient daily operations and rapid service deployment.

- **Simplified SONiC Operations:** Rapidly deploy new services and operate SONiC networks with ease through the intuitive Cruz platform.
- **Complete Network Visibility:** Gain a clear understanding of your network fabric with advanced visualizations, valuable insights, and the ability to see and manage all connected devices—including non-Celestica hardware. Seamlessly transition off legacy systems to Celestica’s cutting-edge solutions with ease and confidence.
- **Automated NetOps and Compliance:** Immediately benefit from powerful automation, real-time monitoring, alerts, configuration management, and active security compliance.
- **Single-Source Support and Design:** Enjoy end-to-end support for hardware, SONiC, and Cruz, along with expert network design and error-free deployment services.

Dorado’s Cruz portfolio offers a transformative approach to open networking, providing powerful, out-of-the-box simplicity with multi-tier capabilities like multi-tenancy, RBAC, and zero-touch automation, ultimately **optimizing costs and reducing downtime**.

About Celestica Platform Solutions

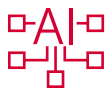

Celestica is a global technology leader with a 2025 annual revenue of \$12.39 billion³ and a worldwide operational footprint. Their strong financial health enables significant investment in high-growth areas, such as AI and cloud platform solutions for both on-premises and the edge. This scale and stability, along with a diversified portfolio, position Celestica as a resilient and capable partner for complex, end-to-end networking solutions. Celestica networking offers:

- **Market-Leading Performance:** Celestica offers validated, high-performance open networking and infrastructure products that meet stringent industry standards.
- **Uncompromised Flexibility:** Customers gain the freedom to architect their open networking and open storage solutions, implementing infrastructure that precisely matches their specific needs.
- **Security of Corporate Strength:** All solutions are backed by Celestica’s corporate stability and proven reliability, ensuring customers gain the agility of open technology with the safety and support of a world-class partner.

Technical Overview

Dorado Software on Celestica Switches

Dorado's software fully supports Celestica switches running SONiC.

AI Networking

Celestica's hardware provides the high-performance foundation for demanding AI workloads. Combined with the **Cruz AI Fabric Controller**, you gain unparalleled orchestration and management. This synergy ensures optimal GPU utilization, simplifies complex AI network deployments, and delivers the agility and reliability needed to accelerate AI training and inference.

Data Center

Celestica switches, optimized for SONiC, are paired with the **Cruz Fabric Orchestrator** to unlock powerful data center benefits. This integrated solution streamlines network design, deployment, and operation, automating critical processes. Gain unmatched **simplicity, scale, and automation**, reducing downtime and optimizing support costs.

Edge and Wireless

Celestica's switches provide the hardware foundation for robust wired and wireless networks. Combined with Dorado's software, including SONiC and OpenWiFi, this solution empowers ISPs and enterprises to build scalable, future-proof wireless infrastructures, **simplifying operations** for broadband access, WiFi, and 5G.

Automated Operations

Coupled with **CruzControl** and **Cruz Operations Center (CruzOC)**, Celestica switches enable powerful and flexible automation. This integrated solution streamlines network deployment, configuration, and management through **zero-touch provisioning** and customizable automation, ensuring consistent, automated network operations at scale.

Automation Benefits

Unlock unparalleled network agility and efficiency by running Dorado software for Celestica switches. This powerful combination delivers robust, open networking hardware with advanced software automation, helping you build flexible, high-performing non-proprietary networks.

Accelerated Deployments

Drastically reduce setup and maintenance time for large-scale network rollouts and refreshes through **Zero-Touch Provisioning (ZTP)** and auto-discovery.

Enhanced Operational Efficiency

Automate complex tasks, such as configuration and software image deployment, across single elements or groups.

Guaranteed Compliance and Security

Ensure corporate standards are automatically enforced for configuration, compliance, and security.

Simplified Multi-Vendor Management

Leverage application-based automation for optimal control of your converged, multi-vendor environment.

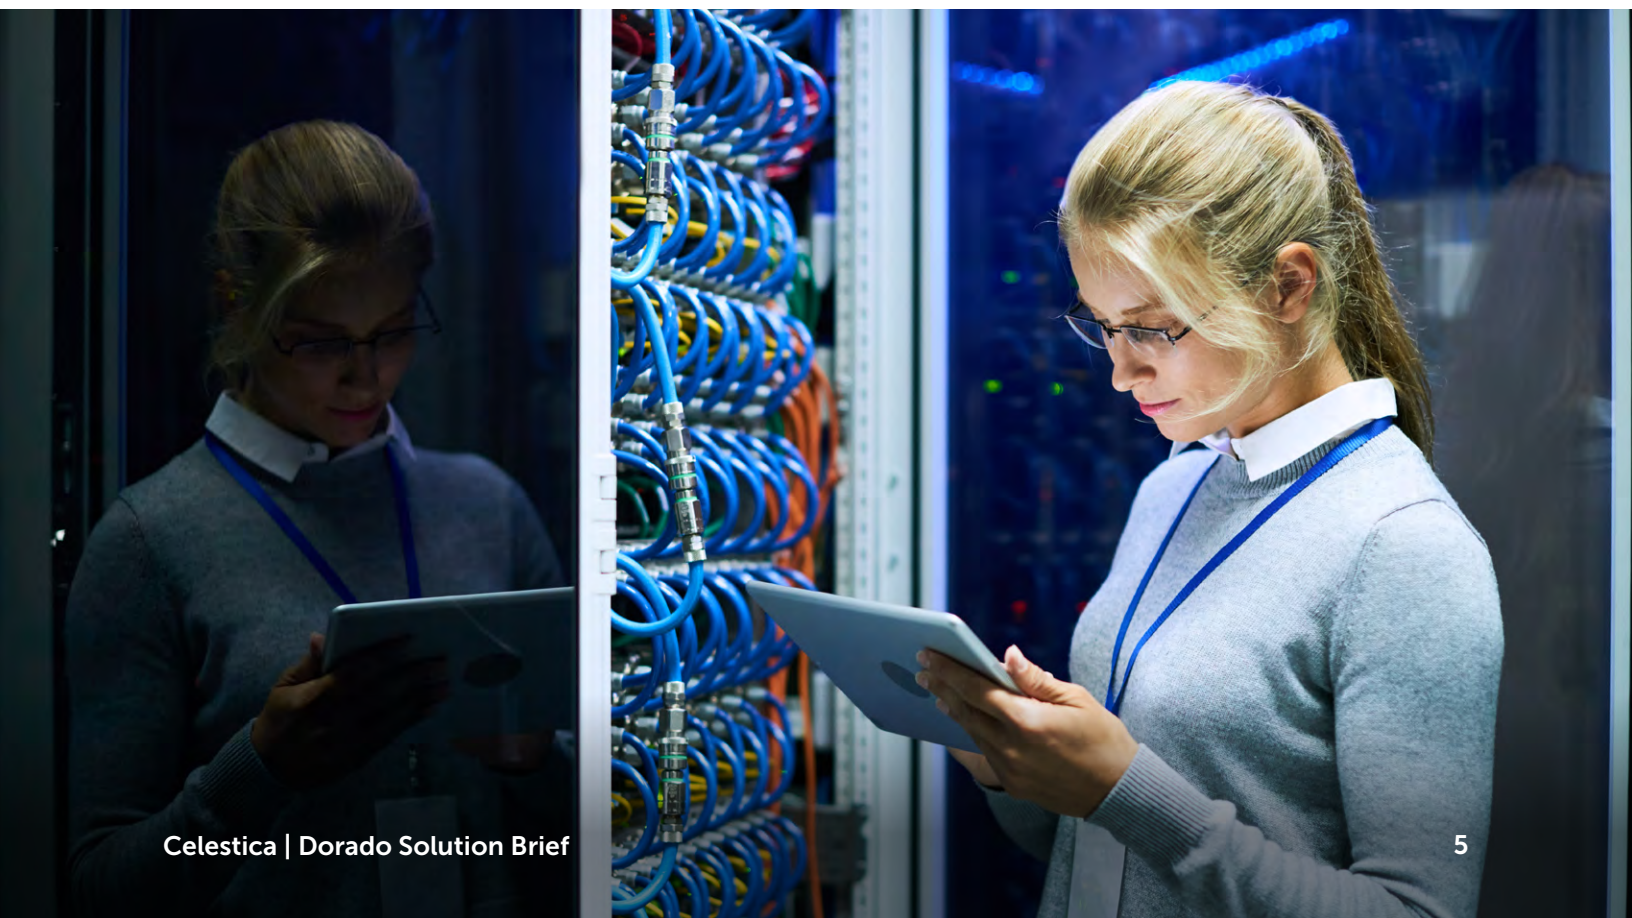

Future-Ready Infrastructure

Confidently adopt open networking solutions with advanced automation that supports continuous innovation.

SONiC Stack Compatibility

Celestica and Dorado offer SONiC-compatible solutions for a wide range of use cases.

Celestica Switch	Key Use Cases	RU/Port Speed
DS5000	AI/ML and Big Data Analytics Hyperscale Data Centers and Cloud Computing High-Performance Computing (HPC) Network Backbone (800GbE Data Center Leaf/Spine)	2U 64-port 800GbE Data Center Switch
DS4101	Next-Gen Enterprise Data Centers High-Performance Edge Locations Hyperscale Data Centers and Cloud Computing Network Backbones (400GbE/800GbE Leaf/Spine)	1U 32-port 800GbE Data Center Switch
DS4100	AI/ML and Big Data Analytics Hyperscale Data Centers and Cloud Computing Top-of-Rack for High Bandwidth Data Center Applications Data Center Network Backbone (800GbE Data Center Leaf/Spine)	1U 16-port 800GbE Data Center Switch
DS4000	400GbE Data Center Leaf/Spine Cloud Computing Scalable Data Centers and Big Data Applications Enterprise Aggregation/Core	1U 32-port 400GbE Data Center Switch
DS3000	100GbE Data Center Leaf/Spine Open and Third-Party Network Operating Systems Low-Latency and High-Availability Applications Enterprise Aggregation/Core	1U 32-port 100GbE Data Center Switch
DS2000	10/25GbE Data Center Top of Rack Broadband Environments Using XGS-PON Enterprise Edge/Aggregation Open and Third-Party Network Operating Systems	1U 48-port 10GbE/25GbE Data Center Switch
DS1000	1GbE Data Center Top of Rack High-Performance Gigabit Ethernet Switching Management Switch Use Cases Open and Third-Party Network Operating Systems	1U 48-port 1GbE Data Center Switch
ES1010/ ES1050	Enterprise/Edge Access Networks SD-Branch/SD-WAN/SASE Campus/Branch/IoT Gateways Management and Connectivity	1U 48-port 1GbE/2.5GbE (PoE) Access Switches

TCO and Support Summary

Total Cost of Ownership (TCO)

Organizations leveraging Dorado with Celestica switches experience:

- **Lower TCO⁴** compared to traditional network vendors.
- Enterprise-grade reliability with continuous performance.

Support and Services

Dorado Support Tiers:

Dorado provides a **single point of contact** for all service and support needs, streamlining issue resolution across multi-vendor environments by coordinating directly with Celestica. Dorado customers benefit from:

- **24x7 support** with Level 1-3 coverage.
- Security patches, bug fixes, and feature enhancements.
- Training and professional services for seamless AI network transformation.

Celestica Hardware Support Tiers:

- **Celestica Care (8x5, Monday-Friday):** Local technical support with access to a knowledge base, online ticketing, and software/firmware updates.
- **Celestica Care Plus (24x7x365):** Global support with a defined response time SLA and internal escalation matrix.
- **Celestica Care Advanced:** Includes all features of Care Plus, an enhanced SLA, and **Two-Business-Day hardware replacement.**
